**DETAILED ACTION**

***Election/Restrictions***

1. Applicant's election without traverse of claims 1-13 (species 1) in the reply filed on 2/22/08 is acknowledged. Non-elected species to 14-27 are withdrawn from consideration.

***Claim Rejections - 35 USC § 112***

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claim 5 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
4. Claim 5 recites the limitation "said hose" in line 2. There is insufficient antecedent basis for this limitation in the claim.

***Claim Rejections - 35 USC § 102***

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Broyden, US Pat. 4,635,903 in view of Godberson, US Pat. 6,554,533.
7. Broyden teaches a suspension for a suspended control device with a control line 20, and a traction relief 22 (figs. 1 and 2) attaches at the top of the control line. A storage area (area between the control 18 and the hoist device 11) for the electrical line 22, where a suspension

Art Unit: 2832

adjustment of the control device can be made by adjusting the length of the relief 22. Wherein, the storage is an area near the reference number 24 is located behind the support 30 of the relief.

***Claim Rejections - 35 USC § 103***

8. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

9. Claim 5 is rejected under 35 U.S.C. 103(a) as being unpatentable over Broyden, US Pat. 4,635,903 in view of Godberson, US Pat. 6,554,533.

10. Broyden teaches a suspension for a suspended control device with a control line 20, and a traction relief 22 (figs. 1 and 2) attaches at the top of the control line, however, does not teach a hose led through a hollow cylinder. Godberson, in fig. 1, teaches a hoist control device with a hose (the electrical wire) 89 led through the cylinder 87 to provide protection to the wire. It would have been obvious to one of ordinary skill in the art at the time of the invention to have used a hollow cylinder as taught by Godberson with the electrical wire of Broyden, since the cylinder would provide protection to the expose wire of Broyden.

***Allowable Subject Matter***

11. Claims 2-4 and 6-13 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 2832

12. Claim 2 recites a flat folderable textile hose stored in the storage. Claimed hose in combination with the claimed structure of the base claim are neither disclosed nor suggested by the prior art of record. Claims 3-4 and 6-13 depend on claim 2.
